DETAILED ACTION

1. Claims 1-40 are pending. Claims 9-31 and 38-40 are withdrawn from consideration as drawn to a non-elected invention and species.
2. Applicant's May 2, 2005 Amendment and REMARKS have been reviewed. The previous rejection is withdrawn pursuant to these Amendment and REMARKS.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8 and 32-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stone et al., US 6,829,587.

Stone discloses a computerized method over a network, e.g Fig. 2a, using a data storage device, e.g. 2500, 4500, for a user to create an advertisement, e.g. col. 3, lines 60-67, for automatic rearranging of a selected product, e.g. cols. 5-6, 1710, 4000, and display a preview to a user, e.g. cols. 13-64. Stone does not specifically disclose the term advertising format.

However, the presentation of the data provided by Stone in an advertising format would have been obvious to one of ordinary skill in the art. The motivation to have provided such for Stone would have been the use of common knowledge computer graphic display techniques.

Further, Official Notice is taken that the advertising mechanism for creating a proposed advertisement claimed, sans the use of a computer, has been common knowledge in the advertising art. In short, Applicant has taken well known proposed advertising means and attempted to claim such incorporated with a computer. To have provided such common knowledge proposed advertising means for Stone would have been obvious to one of ordinary skill in the art.

Also, it is noted that the proposed advertising method claimed need only be physically attached to a computer or computer screen. No electronic data transfer need occur to meet Applicant's claim language. As such, to have attached common knowledge proposed advertising means as recited in the claims on a computer or computer screen would have been obvious to one of ordinary skill in the art. Merely transferring the proposed common knowledge advertising means from a traditional presentation mechanism to being attached to a computer or computer screen would have been obvious to one of ordinary skill in the art.

5. Further pertinent references of interest are noted on the attached PTO-892.

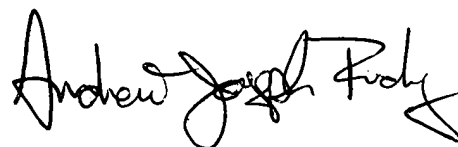

6. Applicant's Information Disclosure Statement has been reviewed. Note the attached PTO-1449.
